

Coastal GA

GREEN COMMUNITIES PROGRAM

A FREE eco-recognition program with custom community solutions, tailored long-term guidance from local experts, and fun benefits that are completely driven by your communities' preferences, needs, and decisions!

We partner with property owner associations to help landowners thrive by reviewing community plans or covenants and providing strategic recommendations that benefit residents and visitors as well as the natural environment. The program provides customized technical assistance and outreach along the way to help communities make decisions together about their land use and neighborhood planning.

Is your community ready to be a leader in environmental stewardship, sustainability, and smart land management?

- ✓ **Save time and resources dealing with coastal issues** like wildlife-conflict resolution, stormwater management practice, and more!
- ✓ **Enhance your neighborhood's prestige** as an environmentally friendly community (which have higher property values)
- ✓ **Access special resident social programs** like citizen science projects, wildlife programs, & expert-led talks
- ✓ **Save money** through sustainable maintenance strategies
